

# Cyber Security Analyst

## Description

### 🔗 Why This Job Isn't Just Another SOC Gig

Netflix streams to over **260 million people worldwide** — and that means attackers are always knocking. As a **Cyber Security Analyst**, you'll be on the frontlines: monitoring threats, investigating alerts, and keeping the binge-watching machine safe. This isn't just another SOC job where you stare at dashboards — at Netflix, you'll analyze real-world attacks, tune defenses, and directly influence how the platform stays secure.

### 🔗 At a Glance

Detail  
Info

#### Estimated Salary Range

\$90,000 – \$140,000/year (varies by experience & location)

#### Location

Los Gatos, CA / Remote (U.S.)

#### What You'll Tackle

Threat detection, incident response, vulnerability analysis, SIEM tuning

#### Tech You'll Use

Splunk, Elastic, AWS Security tools, EDR platforms, scripting (Python, Bash)

#### Certs That Help

Security+, CySA+, CEH, GSEC, or equivalent experience

### 🔗🔗 What You'll Do

- Monitor security events and alerts across Netflix's cloud + global infrastructure.
- Investigate suspicious activity — from phishing to privilege escalation.
- Support incident response: containment, root cause, remediation.
- Correlate logs + events to find hidden attacker patterns.
- Work with engineers to harden defenses and close gaps fast.
- Document and share lessons learned to keep the team sharper every time.

### 🔗🔗 What You Bring

- 2–4+ years in a SOC, blue team, or analyst role.
- Strong familiarity with SIEM, EDR, and log analysis.

#### Employment Type

Full-time

#### Job Location

Los Gatos, CA, USA  
Remote work possible

#### Hiring organization

Netflix

#### Base Salary

\$ 90,000 - \$ 140,000

- Understanding of common attacker tactics (MITRE ATT&CK framework).
- Ability to write detection rules and scripts to automate grunt work.
- Clear communication: you'll brief execs, not just security folks.
- Bonus: cloud security chops (AWS preferred).

## ?? Why Netflix?

- **Impact at scale:** protect a global streaming giant.
- **Culture:** Netflix values freedom, responsibility, and innovation — security included.
- **Growth:** opportunities to move into threat hunting, IR, or cloud security.
- **Perks:** competitive salary, strong benefits, and that *Netflix & Chill* employee vibe.

## ? Ready to Keep the Stream Safe?

- Sharpen your resume with real examples of investigations and alerts you've owned.
- Be ready to talk through a security incident you worked end-to-end.
- Apply directly through Netflix Careers or DamnJobs — but move fast.
- Also peek at related roles like **Threat Analyst**, **Incident Response Specialist**, or **Cloud Security Analyst**.
