Software Engineer II

Description

This isn't your typical "push code all day" gig. At Toyota Connected, you'll be building the brains behind smarter, safer, and more connected cars. Think of it as **tech + data + mobility**. You'll work on backend systems that actually make people's daily drives easier — all while having the **freedom of a hybrid work setup** and the **resources of a global automotive giant**.

Responsibilities

- Design, develop, and deploy backend microservices using Python and AWS.
- Collaborate with product managers and other engineers to deliver high-quality software.
- Write clean, maintainable, and well-tested code.
- Participate in code reviews and contribute to team best practices.

Qualifications

- 3+ years of professional software development experience.
- Proficiency in Python, Go, or a similar language.
- Experience with cloud platforms, preferably AWS (Lambda, S3, DynamoDB).
- Bachelor's degree in Computer Science or a related field.
